

INSTRUCTIONS

22200 - 22205 - 22210 Deluxe Air Bed

Thank you for buying a Texsport Authentic Adventure Gear Product. We hope you enjoy your new air bed and that it will serve you with many years of pleasure. We encourage you to read and understand each step of the set-up instructions prior to working with the air bed.

TO INFLATE:

- Lay air bad out evenly over a flat surface.
- Remove top cap from the Boston valve (A2) and insert nozzle from an electric air pump, hand pump or foot bellows (not included).
- Inflate slowly to allow even air circulation, leaving a few pleats.
- Should over inflation occur, release excess air using pinch valve (B).
- When being used by more than one person at a time, less air will be required for comfort.

TO DEFLATE:

- Remove bottom cap from the Boston valve (A1) and force air toward the opening by laying on the air bed or by hand.
- For best results, use the exhaust or "deflate" port of an electric air pump.

CARE AND MAINTENANCE:

Clean with mild soap and water.

Do not store when wet.

Store in a dry, temperate place.

WARNING:

DO NOT use this item as unintended by the manufacturer.

DO NOT use this item as a floatation device.

DO NOT expose air bed to extreme temperatures. Excessive heat or cold will damage welds.

DO NOT inflate with an air compressor.

DO NOT inflate with canned or compressed air.

Questions: If you should have any questions, problems or comments, please call our Customer Service Department at 1-800-231-1402 or e-mail info@texsport.com. This Department is open M-F from 8 a.m.-5 p.m. CST.
