

INSTRUCTIONS

Air Bed with Pump # 22400 & 22410

Thank you for buying a Texsport Authentic Adventure Gear Product. We hope you enjoy your new air bed and that it will serve you with many years of pleasure. We encourage you to read and understand each step of the set-up instructions prior to working with the air bed.

NOTE:
Do not inflate with compressed air. This voids the warranty. For inflating, lay out flat. Air bed must be at room temperature. Inflate slowly leaving a few folds. If you over inflate you will weaken the weld and void the warranty.

BATTERY INSTALLATIONS:

1. Push tab on battery door to the right to open. Insert 4 "D" cell batteries as indicated inside battery casing.
2. Close battery casing door.

HOW TO INFLATE

1. Turn knob on pump to the right to inflate.

HOW TO DEFLATE:

1. Turn knob on pump to the left to deflate. Remove all air for easy storage.
2. For quick air release, pull open LARGE round air valve.

CARE AND MAINTENANCE:

- Check the air level of the bed occasionally. If more that one person is using the air bed at the same time, less air may be required for comfort. Experience will suggest the best air levels.
- The air bed should be cleaned if necessary with soap and water. Do not use chemicals, scouring powder or any other abrasive. This will ruin the material.
- Do not expose the air bed to extreme temperatures.

Questions: If you should have any questions, problems or comments, please call our Customer Service Department at 1-800-231-1402 or e-mail info@texsport.com. This Department is open M-F from 8 a.m.-5 p.m. CST.
